EMPEROR JC6200 SERIES

CARD PRODUCTION AND PERSONALIZATION SYSTEM

Measurable Operational Benefits

A POWERFUL SYSTEM FOR SMART CARD PRODUCTION AND PERSONALIZATION

Now, you can gain the control over the factors as you need that determine the success of your smart production and personalization system is the optional solution to integrate contact card, contactless card and dual chip card production and smart card personalization. You can produce the smart cards you need on demand. Best of all, we provide OCR system for card examine which save labor cost and increase card production efficiency.

PRODUCE HIGH-QUALITY SMART CARDS ON DEMAND

The EMPEROR JC6200 Series system converts smart cards into high-quality smart cards quickly and reliably. It provides optional functions as you need for fast and efficient smart card production. This highly reliable system produces contact, dual-interface, and 2in1 smart cards to meet a variety of requirements. The system is compatible with EMPEROR Smart Card Personalization Manager (ECPM), which makes the process productive and secure.

DRIVE PRODUCTIVITY TO NEW LEVELS

The speed and reliability of the JC6200 series help ensure super throughput. Combine this inherent productivity with software-driven productivity solutions from EMPEROR and drive efficiency gains in jobs of all sizes.

ADVANCED SECURITY FOR DATA

A windows operating system offers a variety of security feature to protect card data. System-level security features allow you to authenticate operators and control access to data, applications and specific jobs. As a result, individual operators do not see sensitive data unless you provide authorization.

EMPEROR JC6200 SERIES

CARD PRODUCTION AND PERSONALIZATION SYSTEM

Personalized Functions

JC6200D: Small size machine to provide the high speed card issuance and examine function for Dual chip, Single chip and contactless cards.

JC6200F: Not only an issuance system, but also examine the interface data with chip data to ensure cards are correct and in the right sequence for Dual chip, Single chip and contactless cards.

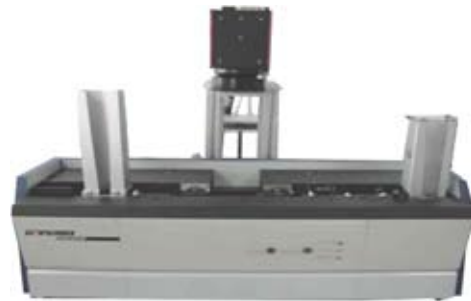

JC6200G: Not only provide the high speed card issuance and examine function for Dual chip, Single chip and contactless Cards. But also provide laser personalization on the both back and front side.

EMPEROR JC6200 Series

Specification

IC Card information reading, writing and verifying

Normal and abnormal card automatic sorting;

IC Card number counting

Speed: up to 7500 cards/h

Reclaiming-card-socket and damaged-card-socket designs;

Software agreements are suitable for all kinds of contactless card readers

Operation interface humanization

Belt transfer, no scratch, easy maintenance, reliable Performance;

RS-232 serial interface, directly connect with PC;

Technical Parameters

Loader Capacity: 500pcs

Communication interface: RS-232

Power input: AC 220V±10% / 50HZ

Power output: DC24V, 12V, 5V

Power: 130W

Working environment temperature -10-50 humidity 30% - 80%

Dimensions:745(L) x 280(W) x 360(h)mm

Weight:31kg
